PROFILE

Hello! I'm Rakib, a junior web developer with a deep passion for crafting dynamic and engaging web experiences. I have a robust foundation in modern web technologies, including HTML, CSS, and JavaScript, and I specialize in:

- Frontend Development: Creating interactive user interfaces with React.js.
- Backend Development: Building scalable server-side applications using Node.js and Express.js.
- Database Management: Leveraging MongoDB for data storage and retrieval.
- Authentication & Security: Implementing secure user authentication with Firebase and JWT.

I thrive on bringing innovative designs to life, transforming complex ideas into user-friendly solutions, and constantly learning new technologies to enhance my skill set. My goal is to build web applications that are not only functional but also a delight for users.
